PROFESSIONAL SUMMARY

Results-driven Software Engineer with 4+ years of experience designing, building, and supporting large-scale, mission-critical enterprise applications in Java. Currently delivering core post-trade clearing and allocation technology for Morgan Stanley at PwC across 35+ global markets, leading regulatory, onboarding, and platform-modernization initiatives. Known for rapid ramp-up across new markets, domains, and technologies, with a continuous drive to upskill - currently pursuing a master's alongside full-time work. Strong command of the full software development lifecycle, cloud, observability, and AI-assisted automation, with a talent for translating complex business requirements into robust, compliant, scalable solutions.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, SQL, HTML/CSS

Frameworks: Spring Boot, Spring MVC, Hibernate / JPA, Thymeleaf, Bootstrap

Databases: PostgreSQL, Oracle, MySQL

Cloud & DevOps: Microsoft Azure (AKS, VMs, VMSS, Key Vault, App Service, Functions, Storage), AWS (EC2, S3, Lambda, DynamoDB, ELB, ASG), Docker, Azure DevOps, Snowflake

Observability & Messaging: OpenTelemetry, Grafana, JMX, Message Queues, Event-Driven Processing

AI & Automation: Claude, ChatGPT, GitHub Copilot, Custom AI Skills, Workflow & Log-Analysis Automation

Tools & Collaboration: Git, GitHub, Bitbucket / Stash, Jenkins, Maven, Jira, Confluence, Veracode, CI/CD, SAST / SCA, TCM, Agile / Kanban

Domain Expertise: Capital Markets, Post-trade Clearing & Settlement, SEBI Regulations, Trade Allocation, Market Onboarding, Telecommunications

Operating Systems: Linux (RedHat, Ubuntu, Rocky), Windows, macOS

PROFESSIONAL EXPERIENCE

Senior Associate – Software Engineer

PwC India | Client: Morgan Stanley

Apr 2025 – Present

Bangalore, India

Application: MARS (Matching, Allocation and Registration System) - post-trade clearing platform processing trades across 35+ global markets.

- Develop, enhance, and support core trade-clearing and account-allocation features in Java on MARS, delivering 20+ critical JIRA tickets on time across enhancements, bug fixes, and production support.
- Built working knowledge across 35+ markets spanning Asia, EMEA, and North America (NSE, BSE, CME, NYMEX, SGX, ASX, LME, HKFE), enabling faster cross-market issue resolution and greater team versatility.
- Drove multiple high-impact initiatives: NSE SEBI option-premium regulatory compliance for the Indian market, real-time margin calculations for India (improving risk visibility and operational responsiveness), and BSE onboarding to clearing-side business readiness.
- Contributing to the 2026 ASX Futures Clearing Platform replacement, including integration with the new ASX ClearStar API; also driving Preclear Resilience (exception reduction) and Preclear Renovation (re-architecture for higher throughput and stronger risk control).
- Engineered application observability by integrating OpenTelemetry with Grafana dashboards, and automated EOD reporting and real-time margin-discrepancy alerts in Python, reducing manual effort and accelerating issue response.
- Built AI-powered productivity skills for the team like automating log-exception detection and repetitive workflows to accelerate developer velocity and reduce service disruption.
- Modernized the technology stack: migrated source control from Bitbucket (Stash) to GitHub, upgraded the codebase from JDK 8 to JDK 21, refreshed libraries and dependencies, and handled JMX configuration and code changes - debugging and resolving issues uncovered during the upgrades.

- Presented the MARS platform and the team's annual accomplishments to a Managing Director in Equity, Sales, Trading & Risk Systems, earning visibility at senior-leadership level.
- Owned the full lifecycle on-site - requirements, development, dev/QA testing, test-evidence collection, TCM change management, and deployment - partnering directly with client Product Operations and Business Analysts on demos and sign-offs.
- Strengthened code quality through code reviews and refactoring, and proactively supported teammates on technical challenges and production incidents - consistently praised by the client for fast ramp-up and strong ownership.

Software Engineer

Oct 2021 – Apr 2025

Tech Mahindra | Client: AT&T Services Inc.

Bangalore, India

- Orchestrated the migration and seamless integration of time-reporting screens used by a workforce of 60,000+ field technicians into the Infor system.
- Designed, coded, and tested core features of a web-based Java application critical to the daily operations of 60,000+ technicians managing DSL / POTS / U-Verse services across the United States.
- Migrated a Java application from on-premises infrastructure to Microsoft Azure, including a database migration from Oracle to PostgreSQL and SQL query optimization that improved overall system performance.
- Performed golden-image upgrades of virtual machines and Azure Kubernetes Service (AKS) clusters, identifying and remediating security vulnerabilities.
- Implemented OpenID Connect and role-based authentication using Java and JavaScript, integrating Azure Key Vault across Java and Python applications.
- Managed SSL certificates and conducted SAST and SCA scanning to address application and infrastructure security vulnerabilities.
- Developed Python cron jobs for automated file processing and integrated SMTP mail services into Python scripts.
- Produced comprehensive reports to communicate complex technical information to business clients.

EDUCATION

Master of Software Engineering

2024 – 2026

Birla Institute of Technology

Bachelor of Aeronautical Engineering

2015 – 2019

Shree Devi Institute of Technology

CERTIFICATIONS

- GitHub Copilot - GitHub - May 2025
- GitHub Actions - GitHub - May 2025
- Microsoft Certified: Azure Data Scientist Associate (DP-100) - Dec 2024
- AWS Certified Cloud Practitioner - Dec 2023
- Microsoft Certified: Azure Data Fundamentals (DP-900) - May 2022
- Microsoft Certified: Azure Fundamentals (AZ-900) - May 2022
- Cisco Certified Network Associate (CCNA) - Jul 2021

AWARDS & RECOGNITION

- Bravo Award, Tech Mahindra (Jul 2024) • AQT Ninja, Tech Mahindra (Jan 2023) • Best Team, Tech Mahindra (Dec 2022) • Pat on the Back, Tech Mahindra (Sep 2022) • Spotted, Tech Mahindra (Apr 2022)
